# IT Disaster Recovery

## Build and Update your IT Disaster Recovery Plan on the Preparis Platform

**IT professionals, CISO's, and BC/DR directors love our all-in-one suite for business continuity** with the easy to use, guided workflows that help save time. With the addition of IT Disaster Recovery, the Preparis platform is a no-brainer choice for IT professionals looking for one suite to build, customize, and update their plans.

## Capabilities

**Easily import and update your vendor and technology data**
Easily update technologies, RPO's, Tiers, and Vendors using bulk uploads to the Preparis platform.

**Out of the box, expert-built templates**
Get to your compliant plans faster by leveraging our expert built, out of the box IT/DR templates.

**Customize your IT/DR plans to your needs**
Leverage plan builder for easy, drag and drop updates to your IT/DR plan templates.

**Guided workflow to build & update IT/DR plans**
Guided step-by-step workflows for IT/DR program managers and technology owners to select technologies and build recovery plans.

**Dashboard and reports**
Easily keep your IT/DR planning program on track: monitor progress, resolve issues, and find and manage gaps between business needs (RTOs) and recovery capabilities (estimated recovery time).

**Prioritize critical applications & technologies**
Import technologies and applications with defined tiers. Review critical process dependencies and needed RTO's for technologies.

> Building our plans in Preparis is exactly as easy as we expected it to be. Preparis simplifies IT/DR planning by combining all of our needs under one umbrella.
